- Excellent symmetry
- Common carrier shippable

## **The 'Classic' BiLog® Antenna**

The CBL 6111D is a high performance ultra wideband BiLog® antenna for emission and immunity EMC testing. This is the original 'classic' BiLog® combining two antennas in one, making savings of at least 20 - 30% on test time and reducing measurement errors due to cable and connector wear.

## **Optimized for Emission Measurements**

The CBL 6111D has been accepted worldwide for emission measurements. The CBL 6111D, although used primarily as an emission measuring antenna, can handle CW powers up to 300 watts, making it suitable for most immunity measurements requiring fields up to 10 V/m, or even greater. The CBL 6111D is linearly polarized and exhibits excellent balance (< 1 dB) and cross polarization performance (> 20 dB).
